

4 WAYS TO REDUCE YOUR POWERED INSTRUMENTS COSTS

Hall 50™
Powered Instruments
System

For facilities looking to save money without sacrificing performance, CONMED's Hall 50™ Powered Instruments System has the lowest total cost of ownership of any system on the market.

1

More Cost-Effective Sterilization

CONMED'S Hall 50™ UL-approved autoclavable lithium batteries can be sterilized in the **same tray** as handpieces and attachments – at the **same time** – eliminating the time and cost of additional separate Sterrad battery processing.

2

Proven Water Protection

Moisture kills electronics. CONMED'S Hall 50™ handpieces have the highest moisture protection rating (IPX) on the market to help reduce service and replacement costs.

3

One Handpiece for Large & Small Bone Procedures

CONMED'S Hall 50™ universal handpiece does both large & small bone procedures – eliminating the capital, operational, service and upgrade costs of having separate handpieces.

4

No Unnecessary Upgrade Costs

Purchasing a new Hall 50™ handpiece doesn't require upgrading your existing attachments and other accessories – so you get new technology at lower costs.
