100 % Made in Germany

Unser Familien-Unternehmen ist schon seit dem Jahr 1921 auf die Herstellung hochwertiger chirurgischer Instrumente spezialisiert. Seit nunmehr 88 Jahren wird die Liebe zur Perfektion und zur Qualität von Generation zu Generation weitergegeben.

Wir verwenden nur bestes, von uns geprüfetes Rohmaterial aus deutscher Fertigung. Solide deutsche Handwerksarbeit auf modernsten Fertigungsmaschinen ergeben perfekte Instrumente mit einer langen Lebensdauer. Wir haben ein Qualitätsmanagement-System nach DIN EN ISO 13485. Um unseren hohen Qualitätsstandard garantieren zu können, werden sämtliche Produkte in allen Produktionsstufen und nach Fertigstellung zu 100 % geprüft.

Unser Unternehmen hat die richtige Größe: Groß genug, um auch große Aufgaben rasch erledigen zu können. Und klein und flexibel genug, um auch auf Ihre Sonderwünsche einzugehen oder um nur Einzelstücke zu liefern. Sondermodelle nach Kundenwunsch fertigen wir nach Zeichnung oder Muster. Schicken Sie uns bitte auch Ihre Anfragen über Modelle die nicht in diesem Katalog verzeichnet sind.

100 % Made in Germany

Our family-run business has been specialized in the manufacture of high quality, surgical instruments since 1921. Over the last 88 years our love for perfect quality has been handed down from generation to generation.

We use only the best, German-manufactured raw materials, which are tested by us. Traditional quality craftsmanship, using the most modern production machines, results in perfect instruments with long durability. We have a quality management system according to DIN EN ISO 13485. In order to be able to guarantee our high quality standard, all products are tested in all stages of production and once more 100 % after finishing.

Our company has the right size: big enough to be able to handle large orders. And small and flexible enough, also to respond to your special wishes or to supply just one piece only. We produce special models to meet customer requirements according to drawings or samples. Please also send us your enquiries about models, which are not listed in this catalogue.

100 % Made in Germany

Notre entreprise familiale est spécialisée, depuis 1921 déjà, dans la fabrication d'instruments chirurgicaux de haute qualité. Depuis 88 ans maintenant, l'amour de la perfection et de la qualité se transmet de génération en génération.

Nous n'utilisons que la meilleure matière première de fabrication allemande, que nous contrôlons nous-mêmes. Un travail artisanal sérieux, sur des machines de production très modernes, se traduit par des instruments parfaits d'une grande longévité. Nous disposons d'un système de gestion de la qualité répondant aux normes DIN EN ISO 13485. Pour pouvoir garantir notre haut niveau de qualité, nous contrôlons à 100 % tous nos produits, à tous les stades de la production et après leur achèvement.

Notre entreprise a la taille qui convient: elle est suffisamment grande pour nous permettre d'exécuter aussi, rapidement, les missions d'envergure qui nous sont confiées. Et elle est suffisamment petite et souple pour répondre également à vos souhaits particuliers ou bien pour vous fournir des pièces individuelles. Nous réalisons sur plan ou échantillons les modèles spéciaux qui nous sont demandés par nos clients. Faites-nous parvenir vos demandes pour des modèles qui ne figurent pas dans ce catalogue.

100 % Made in Germany

Desde el año de 1921 nuestra empresa familiar se ha especializado en la fabricación de instrumentos quirúrgicos de la más alta calidad y ya desde hace 88 años estamos transmitiendo de generación en generación nuestro afán por la perfección y la calidad de nuestros productos.

En la manufactura de nuestros productos utilizamos única y exclusivamente materiales alemanes de la mejor calidad, que nosotros mismos probamos antes de utilizarlos. Hacemos el mejor trabajo artesanal usando la maquinaria más moderna lo que reditúa en instrumentos perfectos de gran duración. Hemos implantado un sistema de control de calidad de acuerdo a las normas DIN EN ISO 13485. Todos nuestros productos, tanto durante todas las etapas de su fabricación, como a su finalización son sometidos a las más variadas pruebas garantizando así nuestros altos estándares de calidad.

Nuestra empresa tiene el tamaño adecuado: Es lo suficientemente grande para poder ejecutar trabajos y tareas grandes rápidamente y lo suficientemente pequeña y flexible para hacernos cargo de los deseos y requerimientos específicos de nuestros clientes, estando en condiciones también de fabricar una sola pieza. Podemos fabricar modelos especiales de acuerdo a las especificaciones de nuestros clientes, ya sea basándonos en planos o en muestras que se nos suministren. Gustosamente aceptamos también sus requisiciones de modelos que no aparecen en este catálogo.

Zertifikat

mdc medical device certification GmbH
bescheinigt hiermit, dass das Unternehmen

Carl Teufel GmbH & Co. KG
Tuttlinger Straße 30
78576 Liptingen
Deutschland

im Geltungsbereich

**Entwicklung, Herstellung und Vertrieb von
wieder verwendbaren chirurgischen Instrumenten**

ein

Qualitätsmanagementsystem

eingeführt hat und anwendet.

Ein Audit von mdc hat den Nachweis erbracht,
dass dieses Qualitätsmanagementsystem
die Forderungen der folgenden Norm erfüllt:

DIN EN ISO 13485

**Medizinprodukte – Qualitätsmanagementsysteme –
Anforderungen für regulatorische Zwecke**

(ISO 13485:2003)

Dieses Zertifikat ist gültig bis:	2010-07-01
Zertifikat-Registrier-Nr.:	0058.48.01/1
Stuttgart, den	2006-02-09

Verschiedene Pinzetten in gleicher Bauart, mit glattem Maul, gerieftem Maul oder löffelförmigem Maul, in 30°, 60° oder 90°, kniegebogen oder über die Fläche gewinkelt, sind auf Wunsch lieferbar.

Forceps of same pattern, with plain jaws, serrated jaws or cups, straight, angled sideways or on flat, 30°, 60° or 90°, are available upon request.

En option, diverses pinces de même type, à mâchoires lisses, cannelées ou en forme curette, à 30°, 60° ou 90°, angulaire ou coudées à plat.

Si se desea, se pueden suministrar también diversos pinzas del mismo tipo, de boca lisa, estriada o de forma acucharada, en 30°, 60° ó 90°, rectas, acodadas o anguladas sobre el plano.

À CHIRURGIE**

**TIJERAS
PARA CIRUGIA**

Die meisten Scheren können wir auch in Supercut-Ausführung liefern. Die messerscharfe Schneide schneidet weich und mühelos auch durch dickes Material, die gezahnte Schneide (Wellenschliff) auf der anderen Seite verhindert daß das zu schneidene Material weggleitet. Zur leichteren Identifizierung haben Supercut-Scheren eine kratzfeste, schwarze Beschichtung der Griffbranchen.

Supercut ist nicht geeignet für Drähte, Knorpel und anderes hartes Material.

Bei Anfragen geben sie bitte die Artikelnummer des Normalmodelles an. Wir nennen Ihnen dann gerne den Preis und die Liefermöglichkeit für die Supercut-Ausführung.

We can also supply most scissors in Supercut version. The razor-sharp cutting edge cuts smoothly and effortlessly even through thick materials, the serrated cutting edge on the other cutting edge prevents the material from slipping. Supercut scissors have a scratchresistant, black coating on the handles for easier identification.

Supercut is not suitable for wires, cartilage and other hard materials.

Please state the article number of the standard model with any enquiry. We will then gladly quote the price and specify the availability of the Supercut version.

Nous pouvons également livrer la plupart des ciseaux en exécution Supercut. La lame tranchante permet de couper également, en douceur et sans effort, un matériau épais. La lame dentelée (rectification andulée), de l'autre côté, empêche le matériau à couper de glisser. Pour faciliter leur identification, les ciseaux Supercut comportent sur les branches un marquage noir et résistant aux rayures.

Supercut ne convient pas pour les fils métallique, cartilages et autres matériaux durs.

Sur vos demandes, nous vous prions de bien vouloir indiquer le numéro d'article de modèle normal. Nous vous communiquerons alors le prix et les possibilités de livraison du modèle Supercut.

La mayoría de las tijeras las podemos suministrar en la versión Supercut. La hoja de la tijera lisa y afilada corta suavemente y sin problemas, inclusive materiales gruesos, la contrahoja dentada de la tijera, con filo ondulado impide que el material por cortar resbale. Para identificarlas mejor, los mangos de las tijeras Supercut llevan un recubrimiento negro resistente a las rayaduras.

Las tijeras Supercut no son apropiadas para cortar alambres, materiales cartilaginosos y otros tipos de materiales duros.

En sus requisiciones suministrenos por favor el número del artículo del modelo normal y nosotros con gusto le informaremos el precio y las posibilidades de suministro de la versión Supercut.
