

Katana™ Flush Cutter

Designed for fast and effective suture cutting, the Katana™ Flush Cutter can cut up to two limbs of #2 Hi-Fi® Suture, Hi-Fi® Ribbon, or Hi-Fi® Tape.^{1,2}

Features and Benefits

Effective Cutting

Katana™ Flush Cutter can cut two limbs of #2 Hi-Fi® Suture, Hi-Fi® Ribbon or Hi-Fi® Tape at once.^{1,2,3}

Two Versatile Techniques

To meet surgeon preferences, this cutter can be loaded outside the joint and slid down the suture or inserted into the joint from any portal and then side-loaded to cut the suture.¹

Flush Cutting

Designed to help eliminate long suture tails, the Katana™ Flush Cutter provides a clean, flush cut optimized for knotless repairs.³

To simplify your suture cutting, call **1-800-237-0169** to arrange a live demonstration with your local CONMED Sales Representative or visit [CONMED.com/Katana](https://www.conmed.com/Katana) for more information.
