2012 All Right Reserved, Printed in Türkiye

AYGÜN, one of the leading establishment of Turkey in the medical industrial field, starting from neurosurgical field since 1988, at the end of its constantly R&D researches, has accomplished the production of instruments for all surgical branches. Along with meeting a large part of Turkey's requirements, it proves itself as an expert in the field with the products offered to the world market.

With present catalogues that include standard products and the special products formed on the request of the doctors including approximately 22.000 different types of instruments produced by AYGÜN. Besides being a manufacturer, it is also a designer firm.

Besides increasing its capasity, AYGÜN, in its new production plants constructed in the Organized Industrial Area of Samsun, aims to present the different models of products to the medical community.

INSTRUMENTS

AYGÜN, introduces to you in this catalogue that the containers with anodized aluminium and polymer cover in order to well organize the operation room and sterilization center and storage.

In order you to choose the best, Aygün provides;

- High number of dimensions
- Filter and Bio-Barrier models
- Aluminium and polymer cover varieties
- Mean of wide range of accessories
- Quality system following the standards and regulations, and Aygün takes a distinguished place among the container maunfacturers in the world.

AYGÜN; in this catalog, feels pleasure to present you its production program related to Sterile Container Systems besides the production of instruments in all surgical branches.

in use of the Sterile Container Systems;

- Life of instruments usage,
- Period of sterility protection,
- Protection of hygenic situation of hospital in transporting instruments after usage
- Washing the instruments,
- Control of transportation,
- Sterility protection of set arrangement, are considered to be very useful factors.

The Sterile Container Systems, manufactured according to high quality, level of international standards and workmanship, are under guarantee of AYGÜN.

PPSU
POLYMER COVER

- Container cover made of polymer have an option of six different colors and a transparent one. The cover is resistant to scratches, hits and color fading.

- Observing the inside of the container without opening the cover is only possible by the usage of the transparent covers.

- Pay attention to:

* Solvents such as acetone, thinner, and gas should not be used.
* Distilled water or water without mineral

The mechanism of the lock can stand stationary in every required position and it is adjustable into lid up to 180°

In reliable position, the containers can be put on top of each others without sliding over the sides.

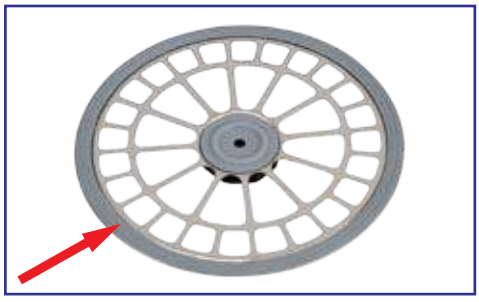
The security plastic seals will be broken upon the lock is opened and this action makes it possible to follow up the sterilization process.

By means of the locking latches, the holders of the filters enable the filters be changed quickly.

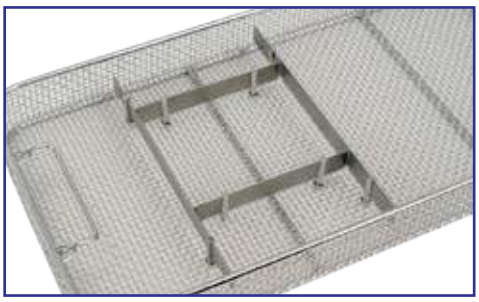
The mechanism of the lock can be utilized as the lid handle.

The silicon gaskets placed around the inside of the lid, enable the security of the sterilization process.

The colored labels which give the description and the department of the sterile item, are in changeable features.



The silicon gaskets placed around the inside of the lid, enable the securty of the sterilization process.



The holding pins and plates for separation wire baskets or desire.

The silicon mat, for placing the micro instruments.

Silicone handle has available in six different colors and detachable by user.

The drape retainer.

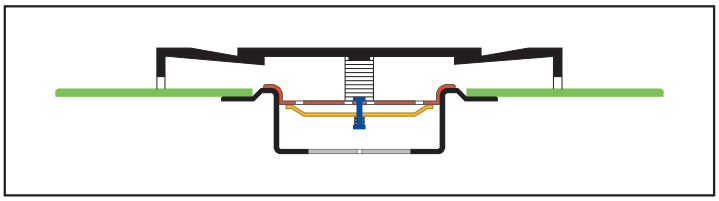
Spiral holder

Wire buttom, balanced placement and steam circulation safety.

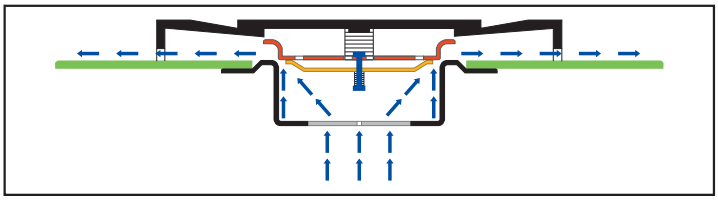
The fixation clamps for the cylindirical instruments in different sizes.

The trolley for protection and transporting of the containers between the departments.

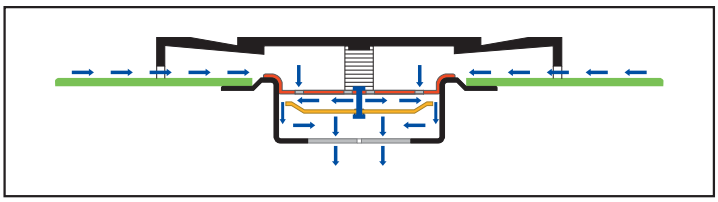
The method of mounting - de-mounting the safety lid of the fix model container.



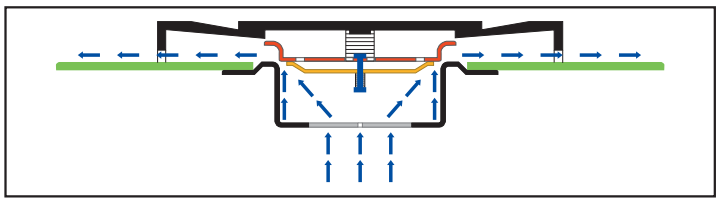
1. Before sterilization the valves are in relax position



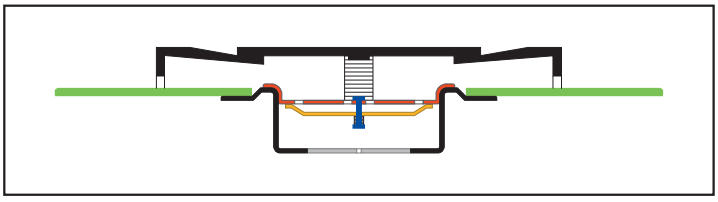
2. During the sterilization by effect of vacuum the valves are opened completely and the dry air goes out of the container.



3. At the end the sterilization cycle the valves are opened in the reverse way by effect of vacuum and the sterilization cycle is completed.



4. At the end of the sterilization cycle the sterilizator equates the pressure level and the valves of the Barrier Model Container are closed.



5. After sterilization the valves are in relax position.

SUITABILITY OF OUR STERILE CONTAINERS FOR STEAM STERILIZATION PROCEDURES [1)]

Explanation of symbols: + applicable − not applicable O limited application

1) In order to avoid mistakes with regards to service, operation and/or when loading the sterilizer, please refer to table 1 for correct or wrong combination of sterilization containers for standardized steam sterilization procedures.

2) Only sterilization containers guaranteeing evaporation or discharge of condensate are suitable above.

3) Gravitation procedures having no drying device do not guarantee a sufficient after-drying effect.

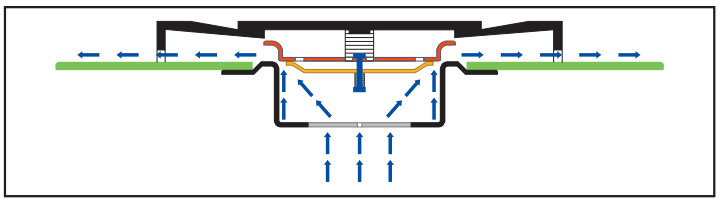
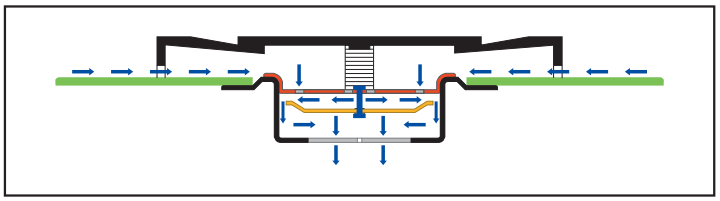
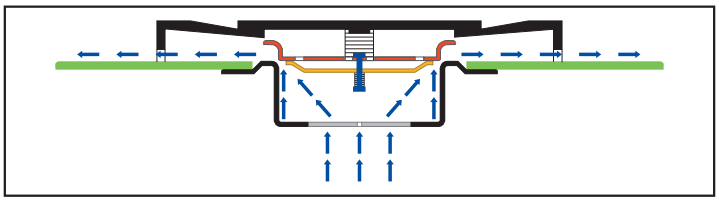
1. Before sterilization the valves are in relax position



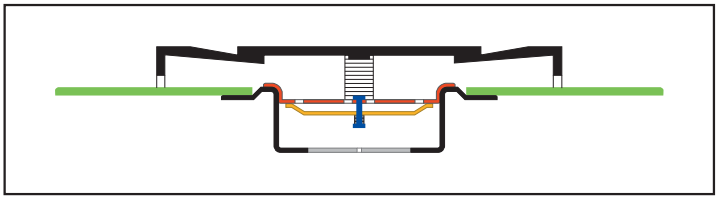
2. During the sterilization by effect of vacuum the valves are opened completely and the dry air goes out of the container.



3. At the end the sterilization cycle the valves are opened in the reverse way by effect of vacuum and the sterilization cycle is completed.



4. At the end of the sterilization cycle the sterilizator equates the pressure level and the valves of the Barrier Model Container are closed.



5. After sterilization the valves are in relax position.
