Delivering The Performance You Demand!

FEATURES AND BENEFITS

LOADING:

Push single-use cartridge forcefully into the handle and rotate in any direction for a "Quick Connect."

UNLOADING:

1. Line up the arrows on side of handle and on the cartridge.
2. Grasp ribbed "Tabs" located on both sides of the barrel of the handle with the thumb and forefinger.
3. Slide (pull) the Tabs back with both fingers.
4. Rotate cartridge one quarter turn in any direction and pull cartridge out.

- Rotating head allows for 360° rotation and placement of staple.
- Clear cartridge provides clear visibility and centerline pointer has 90° clear visual access.
- Optimal staple placement with zero staple recess that eliminates pull up of tissue into the staple jaw.
- Single-Use and Multi-Use handles come with ratcheted pre-positioning to facilitate accurate staple placement.
- Re-Loadable Single-Use handle provides cost savings in cases requiring more than 35 staples where multiple cartridges may be used for one patient.
 - * Re-Loadable within single or multi-patient use in concurrence with proper sterilization technique.
- Multi-Use handle is autoclavable and rated for 20 sterilization cycles.
- Patented "Ridged" staple design features long, sharp staple legs for staple security and an adequate gap between the staple and skin line making extraction easier with less patient pain.
- User friendly with easily Re-Loadable "Quick Connect" cartridge with stapler counter.

Features of the Reflex® Rotating Head Staple

The two ridges on the top of the staple are there by design to help promote better wound healing characteristics and to aid in staple removal.

The patented ridge-designed staples are formed from 316L surgical-grade stainless steel.
